Become a Cyber Builder

Protect.ngo

The Protect.ngo foundation exposes harm and defends at-risk communities in cyberspace, with talent, technology and data.

What is the Cyber Builders Program?

The Cyber Builders Program supports nonprofit organizations around the world in strengthening their digital resilience, **free of charge**, by connecting them with **volunteer cybersecurity experts** to address gaps and build long-term capacity.

Visit https://protect.ngo/act-now/volunteer for additional information.

1

What volunteer support will I provide?

As a volunteer, you help nonprofits close cybersecurity gaps, improve processes, and safely integrate tools into their operations. You volunteer your time and expertise on our dedicated paltform.

2

What are the cyber missions offered?

Based on your expertise, you can choose from 35 cybersecurity missions ranging from awareness training to phishing exercises and beyond. Mission duration typically ranges from 1 to 4 hours.

3

What nonprofits will I support?

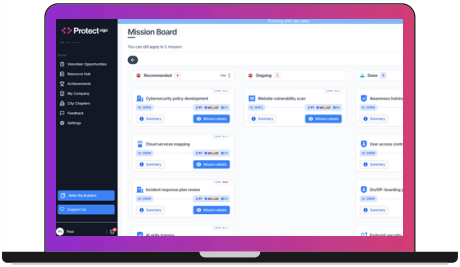

Through cyber missions, you support a global community of more than 700 nonprofit organizations working across diverse fields, including humanitarian action, education, and environmental protection.

4

What do I need to register?

- At least 1 year of professional experience in cybersecurity.
- Currently employed in a cybersecurity role for at least 3 months.*
- An up-to-date LinkedIn profile highlighting your cybersecurity skills and experience.

The individual must be employed by a private-sector company. Employees of government agencies or public institutions, students, academics, and self-employed individuals (including freelancers) are not eligible to join the program.

Join the Builders' Program

- **1 Dedicated platform on protect.ngo**
- **1800+ Cyber volunteers**
- **700+ Registered nonprofits**
- **35 Cyber missions from basic to advanced**

Where to register?

1. Go to protect.ngo/connect to create your account, verify your email, share your LinkedIn account url while filling in your profile's details.
2. After approval, follow the instructions to join Mattermost (our communication platform) and enable multi-factor authentication (MFA).
3. Get secure access to the Builders Portal, where you can get matched with nonprofits and start supporting them with the cybersecurity missions of your choice.
